## EARTHQUAKE IN GREECE

---

On Sunday June 8, 2008 a quite heavy earthquake occurred in Patra in Greece with a force of 6.4 on the scale of Richter. Patra is the place where the Greek production unit of Resilux is located. This earthquake has interrupted the production and has caused damages to the building and parts of the production equipment.

In the meantime Resilux has taken the necessary measures to continue delivering the customers from production locations in other countries of the Resilux group. A major part of the production has in the meantime been restarted again.

As result of the earthquake some production equipment will have to be fully or partly replaced.

Resilux will together with the insurance company take as soon as possible the necessary measures to start the replacement investments. We expect to have in a short time again at our disposal optimal machinery and to be able to fulfill the increasing demand of the market.

The costs that are not covered by the insurance amount to 600,000 Euro and will be taken into the result of the first semester 2008.

The earlier objective of a further improvement of the results in 2008 remains maintained.

\*\*\*

Resilux NV specialises in the manufacture and sales of PET preforms and bottles. These preforms and bottles are used for the packaging of water, soft drinks, oils, etc. Resilux originally was a family business, and was established in 1994. Since 3<sup>rd</sup> October 1997, Resilux has been quoted on Euronext Brussels. Resilux has production units in Belgium, Spain, Greece, Russia, Switzerland, Hungary and in the U.S.A.
